VERTIKOTE
POWDER COATING - INDUSTRIAL FINISHES

ENVIRONMENTAL POLICY

The Vertikote Group cares for the environment in which it operates and is committed to providing resources and leadership to its employees, contractors, customers and visitors so that we minimise operational impacts.

All Vertikote people are accountable for conducting its business in a responsible manner that is designed to ensure protection of our employees, the environment and community's health through the principles of sustainable production.

To this end, Vertikote will:

- Comply with all Environmental regulatory requirements as a minimum and be regarded as a competent performer in environmental management;
- Involve its employees, suppliers, regulators and other stakeholders to develop and implement the best practicable means of minimising the effect Vertikote's activities on the surrounding environment;
- Undertake practical environmental impact & risk assessments across the on-going operation whilst ensuring performance objectives and targets are incorporated into strategic & operational planning;
- Ensure the efficient use of energy and resources by adopting industry best practice, including the minimisation and disposal of waste, regeneration / re-use of water and reduction of greenhouse emissions;
- Provide appropriate knowledge and training for all employees and contractors to encourage and promote environmental awareness and accountability;

Vertikote, its people, and their families depend on everyone being committed to the success of this policy.

P. FALLAS
Managing Director.
